## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 21 and 29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by *MANUAL for the STYCAR VISION TESTS*, Mary D. Sheridan, NFER PUBLISHING COMPANY LIMITED, Thames Avenue, Windsor, Berks, England, 1969.

Sheridan discloses positioning a display medium comprising an optotype chart at varying distances from a subject child. Page 7 teaches the child uses a key-card chart to match the letter indicated on the optotype chart. Pages 7-8 further teach occluding an eye to screen for amblyopia.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

Claims 22-28 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over *MANUAL for the STYCAR VISION TESTS*, Mary D. Sheridan, NFER PUBLISHING COMPANY LIMITED, Thames Avenue, Windsor, Berks, England, 1969 in view of Waltuck et al '981.

Sheridan discloses all of the claimed features except for an LCD monitor and a remote control unit for changing the displayed optotypes.

Waltuck et al teach using an LCD monitor for displaying optotypes and using a remote control unit for changing the optotype in an eye examination procedure.

One of ordinary skill in the art would have found it obvious to use the LCD monitor and remote control teaching of Waltuck et al for displaying the chart as taught by Sheridan because the LCD monitor and remote control teaching apply to similar visual acuity testing and the system of Waltuck et al is intended to replace charts of the type disclosed in the Sheridan reference.
